

More Control, Less Manual Work, Better Financial Visibility.

Payment automation and financial workflows designed to reduce friction, improve cash flow, and support long term growth.

Accepting cards is easy. Efficient Management is not.

Most businesses already accept credit cards. The challenge is what happens after the payment is taken.

Disconnected systems, manual reconciliation, and limited cash flow visibility pull time away from strategic and impactful projects.

Service First Processing brings credit card processing and financial automation together so payments support how your business operates.

Lower Fees

Lower credit card processing costs without sacrificing visibility or reliability.

AP Automation:

Simplify how vendor bills are paid while reducing manual work and improving control.

AR Automation:

Automate invoicing and payments to speed up collections and improve cash flow.

Real Savings driven by Automation & Optimized Processing.

Members see average annual savings of **\$6,863 or 17%**, with an additional **10%** rebate each year.
